

**ENTERPRISE RECOVERY SYSTEMS SITE
MONTHLY PROGRESS REPORT
NOVEMBER 15, 1994**

The following report is submitted in compliance with the Administrative Order on Consent. This report should not be regarded as an exhaustive account of activities on or related to the Site.

PERIOD COVERED: October 15 - November 15, 1994

I. SIGNIFICANT DEVELOPMENTS DURING PERIOD

A. Actions Performed

On November 3, 1994 Woodward-Clyde Consultants collected five surficial soil samples at the site for SVOC and RCRA metal analysis. Mr. Bob Rosen (EPA) and Mr. Dennis Benson (EPA-TAT) were present, and all samples collected by WCC were split with EPA. Mr. Jeff Bennett with EnSafe was also present during the sampling event.

Mrs. Crum was contacted by Mr. Jeff Bennett on November 10, 1994 regarding the cost reimbursement by the ERS Site Group for the municipal water system connection if she agreed to allow the ERS Site Group plug and abandon her groundwater well. Mrs. Crum has agreed to plugging and abandoning her well and she is submitting her municipal water connection invoice to Mr. Bennett.

On November 14, 1994, Mr. Andrew Eversull with WCC was named the ERS Site Coordinator to replace Mr. Jeff Bennett.

B. Problems Encountered

During the November 3, 1994 sampling, a newly constructed house located directly across Cayce Road from the ERS site appeared to have a groundwater well on the property. Mr. Rosen and Mr. Bennett attempted to contact the resident; however, no one was at home. Mr. Rosen indicated he would attempt to contact the Mississippi Department of Environmental Quality to notify the resident of potential groundwater concerns.

Mr. Cook and Ms. Boyce have not responded to date in regards to allowing the ERS Site Group reimburse their municipal water connection cost for plugging and abandoning their groundwater well.

II. ANALYTICAL DATA RECEIVED DURING PERIOD

No data received during this period.

III. DEVELOPMENTS ANTICIPATED DURING NEXT PERIOD

A. Schedule of Actions to be Performed

Analytical data from the November 3, 1994 sampling activity are expected to be available by the fourth week in November. This data will be evaluated and the findings will be incorporated as part of the soil removal workplan.

B. Anticipated Problems

The resident of the new house on Cayce Road will have to be contacted in order to determine if they are using groundwater for domestic purposes. If so, appropriate actions must be undertaken with EPA assistance.

C. Planned Resolutions of Past or Anticipated Problems

None
